## IVY ENBER SCIENTIFIC JOURNAL

### **MASTHEAD**

The Ivy Enber Scientific Journal presents its newest issue corresponding to Dossier 2023.2 entitled: "Literature and Sacred". In the complete edition it is possible to access the file, presentation of the dossier and articles sequenced to the theme and with free definition in Portuguese, English and Spanish.

The editorial team greeted readers and reiterated the invitation to submit their work in the next Dossier 2024.1 "Education: investigations, policies and practices".

We also highlight that invitations to potential Dossier coordinators will consider the researcher profile in accordance with the defined thematic field, and there may be re-readings and new propositions on the part of the coordinators.

It is noteworthy that the Ivy Enber Scientific Journal strives for the objective of academic decorum, promoting in its publications access for society and the academic community to works with rigorous research, offering them international coverage, with a view to the transnationalization of Ivy Enber Christian University, University that promotes the Ivy Enber Scientific Journal as well as other international research projects.

The editorial team reiterates its invitation to read this issue and participate in the Ivy Enber Scientific Journal.

We hope you have a great read!

Managing Editor,

Dr. Kelly Thaysy Lopes Nascimento.
